

4. Axios: file type

Debug Summary: Parse a string as JSON, but the string is not in a valid JSON format. The string in this case starts with `<!DOCTYPE ...`, indicating that is HTML.

Uncaught SyntaxError SyntaxError: Unexpected token '<', "<!DOCTYPE "... is not valid JSON

--- Promise.then ---

5. Axios: Fetching Data Error

Debug Summary: This error message indicates that the requested resource could not be found on the server.

There was an error fetching data `AxiosError {message: 'Request failed with status code 404', name: 'AxiosError', code: 'ERR_BAD_REQUEST', config: {...}, request: XMLHttpRequest, ...}`

6. Layout Error

Debug Summary: After deploying the app, some minor errors occur.

1. The css layout is different before deployed. Navigation bar has no gap between header.
2. After finish editing, the webpage has save the changes but when open the editor again, the setting is still the same as original. Ex: Firstly, change "About Us" into "About Us123" then save and return to about us section could view the changes. After that, open the editor again, the change "About Us123" should be there but it change back to the original text "About Us".
